PREFATORY NOTE

The preparation of the following list was assigned to me under order of June 14, 1912. In its development I have followed the lines laid down by Mr. Charles H. Hastings, then chief of the Catalogue Division, of whose counsel I have freely availed myself since; as well as that of Mr. Charles Martel, the present chief of the Division, and Mr. John D. Wolcott of the Bureau of Education. The services of Miss Alida M. Stephens of the Catalogue Division have been invaluable in the final revision and arrangement of copy.

Mr. Flagg left the service of the Library at the end of March. It had been his intention to close the list in March, allowing April for final editing and May for printing. While he left the manuscript practically ready for printing, his separation from the Library retarded the handling of the proof. The delay has made it possible, however, to include a number of belated items.

INTRODUCTION

This list of American doctoral dissertations has been prepared to fill the need long felt for a publication corresponding in a general way to works of similar scope published abroad.

In May, 1912, the Librarian of Congress sent out a circular letter to the librarians of all universities listed in the latest "Report of the Commissioner of education" as maintaining graduate departments. The replies indicating a unanimity of sentiment in favor of the plan suggested, and conveying offers of cooperation, work was begun in June.

As outlined by the Library of Congress, the procedure is as follows: Every thesis printed, whether separately or in another publication, is to be actually acquired, classified and catalogued by the Library, and from the printed catalogue cards, an annual list prepared of the theses that were printed during each calendar year, beginning with 1912.¹

Clearly a list on this basis does not coincide closely with the degrees granted in the year, a large proportion of such dissertations being printed the year following the receipt of the degree or later, while occasionally publication antedates the degree by a year.

Printed records of the higher degrees (Ph. D. and D. Sc.) are readily accessible; each university lists in its annual catalogue, register or report the names of those receiving the degrees for the year, usually citing the titles of theses; in addition the general or triennial catalogs list such graduates, occasionally with theses; and university bibliographies, where published, also supply the information. A few universities have gone to the trouble of preparing special lists of their doctors and doctoral dissertations.²

The large output of some universities in our list as compared with meagre returns from others does not necessarily indicate the proportion as to degrees granted—a study of the requirements with respect to printing is necessary. These vary greatly among the different

¹ Theses printed prior to 1912 are also being collected as far as possible, and a combined list of all down to that date will be published as soon as the data are at hand.

² "List of degrees granted at Clark University and Clark college." By Louis N. Wilson [1912]

"Doctors of philosophy and doctors of science who have received their degree in course from Harvard university 1873-1909." 1910.

universities and being subject to change, must be sought in the latest publications of the several universities. "The Graduate handbook,"¹ an annual publication of the "Federation of graduate clubs" for 1894-1900, was accustomed to give in tabular form a very convenient conspectus of the requirements of all the leading universities.

Statistics of the number of degrees conferred each year by the various American universities may be found in the annual reports of the Commissioner of education. The late appearance of this list, a year or more after the close of the corresponding fiscal year, lessens somewhat its usefulness.

Lists of the recipients of the doctor's degree of the preceding academic year were also given for 1898-1900 in the "Graduate handbook" mentioned above.

Quite distinct from the foregoing are certain Lists of theses in preparation by candidates for the doctor's degree in the United States, prepared in the interest of the special subject or group of subjects investigated. Those which have come to the compiler's notice are mentioned below.

Natural and exact sciences.—Beginning with 1898 the periodical "Science" has published such a list under the caption "Doctorates conferred by American universities."² It is arranged by university, giving title of thesis in each case.

History.—An annual "List of doctoral dissertations in history, now in progress in the chief American universities" has been prepared and published since December, 1901, by Prof. J. F. Jameson, now director of the Department of historical research of the Carnegie institution of Washington, D. C. Each of the first eleven lists appeared in pamphlet form, with theses classified by university; the 1912 list is found in the January, 1913, number of "History teachers' magazine" with supplement in number for March. That magazine will publish it in future. In its new form theses are arranged by subject. The 1909 number included a list of dissertations from the earlier numbers, which had been printed, and each annual issue since has a list at the end of theses printed during the year.

Political economy.—Since 1904 the American economic association has published a "List of doctoral dissertations in political economy in progress in American universities and colleges" which now appears

¹ The earlier issues bore title "Graduate courses" and the publication was started by the Harvard graduates club until adopted by the Federation. The first six numbers gave the most space to the details of graduate courses in the various universities: after 1898 this material was omitted in favor of proceedings of the Federation, and the publication itself seems to have ceased with the 1900 issue.

² These lists are to be found in the following numbers: Aug. 19, 1898; Aug. 4, 1899; Aug. 31, 1900; Aug. 2, 1901; Sept. 5, 1902; Aug. 28, 1903; Aug. 19, 1904; Sept. 15, 1905; Aug. 17, 1906; Aug. 30, 1907; Sept. 18, 1908; Aug. 20, 1909; Aug. 19, 1910; Aug. 18, 1911; Aug. 2, 1912.

in the "American economic review."¹ It is classified broadly by subject, giving usually the probable date of publication of the dissertation.

Classics.—"The Classical journal" since 1906 has printed an annual list of "Doctor's dissertations in the classics" arranged by universities, and giving publisher when thesis has been printed during the year.²

Political science.—"The American political science review" has printed a "List of doctoral dissertations in political science" since 1910.³ The arrangement is under university, probable date of completion being sometimes given.

The foregoing lists fall into two main classes: those for "Natural and exact sciences" and "Classics" merely citing the theses actually presented for the doctor's degree in the preceding academic year; the other three lists preserving the record of work in progress by candidate for the degree; each thesis appearing annually until publication, or receipt of degree.

Considerable thought has been given to the matter of form or arrangement of this list, and that adopted is the one which seems likely to be useful to the largest number. There is a quadruple arrangement to answer each of the four questions: what author has printed a thesis in 1912; what contributions have been made to each of the great fields of knowledge; what special subjects or topics have been treated and what is the output of each university. The classification under special faculties, as carried out in some foreign publications is impracticable in America.

In each case where thesis has been issued in more than one form we have preferred the regular thesis edition, bearing note to the effect on title page or cover; referring to other editions when known. Where there has been no such thesis edition, even if the work exists only in a considerably enlarged or otherwise altered form, we still list it as the author's thesis, with such note as seems to be necessary.

Authors' full names and dates of birth, are given just as far as the records of the several universities are able to supply them.

The year of conferring of degree is supplied in the thesis note, as valuable information. Where no date is found, it may be understood that as far as we can learn the author is still a candidate for the doctor's degree.

Library of Congress class numbers, in all reclassified sections, are given in the Alphabetic list.

¹ The first issue was a separate leaflet; 1905-1907 in Publications of the American economic association, 3d series, v. 6, no. 2; v. 7, no. 3, supplement; v. 8, no. 2, supplement, respectively; 1908-1910 in the "Economic bulletin" April 1908, April 1909, and March, 1910; 1911-1912 in the "American economic review," March 1911 and June, 1912. Down to 1912 these lists were arranged by university.

² The first number, covering 1900-1905 appeared in June 1906, (v. 1, p. 233-239); later annual numbers in February, 1907, March, 1908, February, 1909, January, 1910, June, 1911, January 1912.

³ Issues of August 1910, August 1911, August 1912.
